X GAMES · GAME DESIGN SPECIFICATION

KASH RUNDOWN

Burst / Crash Game · Urban Police Chase · Mobile First

Crash / Burst	95–97%	High	×8,000	Mobile First	Curaçao B2B
Game Type	RTP	Volatility	Max Multiplier	Platform	License

01 · Game Overview

Full Title: Kash Rundown
Game Type: Burst / Crash Game
Theme: Urban Street · Night City · Police Chase
Avatar: Kash — the X Games gorilla mascot, riding a stolen motorbike
Core Premise: Kash is being chased through a rain-soaked neon city at night.
The multiplier is his speedometer — the faster he rides, the higher it climbs.
Players cash out before the cops catch him.
Getting caught = crash = round over.
Platform Priority: Mobile first (portrait 390×844) · Responsive desktop
Frontend Technology: Pixi.js · WebGL rendering · HTML5
Provably Fair: Yes — every crash point is an on-chain verifiable seed hash

02 · Mathematical Parameters

95–97%	High	$0.10	$500	×8,000	10–35 sec
Target RTP	Volatility	Min Bet	Max Bet	Max Multiplier	Round Duration

Parameter	Detail
RTP by District	Clean Run: ~97% · Siren Zone: ~96% · Ghost Mode: ~95%
Crash Distribution	Provably fair RNG — exponential distribution, mean ~3x. Weighted to give frequent small crashes balanced by rare high-multiplier runs.
House Edge	3–5% depending on district and bribe tier selected
Volatility Profile	High — frequent losses below 2x, occasional 50x–500x runs, rare Ghost Mode events above 500x
Nitro Boost RNG	Collectible appears with ~15% probability per second in phases 1–2, declining to ~4% in phases 4–5
Auto Cash-Out	Player sets target multiplier pre-round — executes as limit order. No additional house edge applied.

03 · Chase Intensity Phase System

The game has 5 escalating phases that change the visual environment, crash probability curve, music intensity, and Kash's mood state. Phases are not timed — they are triggered by the live multiplier crossing thresholds.

Phase	Name	Multiplier	Kash Mood	Environment & Behaviour
1	**Clean Run**	1× – 3×	CHILLIN'	Dry city street, distant sirens, relaxed pace. No cops visible. Kash glances in the mirror.
2	**First Siren**	3× – 10×	LOCKED IN	Rain begins. One police car appears behind. Red/blue lights reflect on wet asphalt. Engine roar increases.
3	**Chopper Up**	10× – 50×	LOCKED IN	Heavy rain. Police helicopter appears overhead, searchlight sweeping. Two cop cars in pursuit.
4	**Full Pursuit**	50× – 500×	LOCKED IN	Storm. Three police cars. Helicopter locked on. Roadblock events become frequent. Crash probability elevated.
5	**Ghost Mode**	500× – 8,000×	BALLIN'	Kash has outrun everyone. Purple neon aura surrounds bike. City blurs.

Phase	Name	Multiplier	Kash Mood	Environment & Behaviour
				Cops out of frame. Ultra-rare territory.

04 · Core Gameplay Mechanics

Roadblock Events Triggers at 3×, 10×, 50× thresholds

Police roadblocks appear mid-run. A 2-second decision window opens — player must tap DODGE LEFT or DODGE RIGHT. Correct dodge adds a +1.5× multiplier bonus and removes the roadblock. Wrong dodge causes a 1-second multiplier pause. Missing the window entirely triggers an immediate crash. Roadblocks become more frequent and faster in phases 4–5.

Helicopter Spotlight Active from Phase 3 onwards

A police helicopter locks on above 10×. A spotlight beam sweeps the screen — visible to the player as a moving light cone. When the beam finds Kash, crash probability spikes sharply for 3 seconds. Players must decide: cash out before the beam lands, or gamble it misses. The sweep pattern is randomised each round using the provably fair seed.

Corrupt Cop Bribe (Buy Bonus) Pre-round purchase — 3 tiers

Before each round, players can pay to 'bribe the dispatcher' — delaying the first crash event and reducing crash probability during early phases. Three tiers: Small ($5 — delays first event 10%, 1 guaranteed safe window), Medium ($25 — delays first event + lower crash probability, best value), Kingpin ($100 — full dispatcher blackout + guaranteed nitro start, maximum protection). Bribe is consumed at round start regardless of outcome.

Nitro Boost Random mid-run collectible

A nitro canister appears randomly on the road mid-run. Tapping it gives an instant +0.5× to +3× multiplier jump. Frequency: ~15% per second in phases 1–2, declining to ~4% in phases 4–5. Multiple nitros can chain in early phases. Ghost Mode starts with a guaranteed nitro if Kingpin bribe was purchased.

Getting Caught = The Crash Provably fair — on-chain verified

The crash is always a narrative event: squad cars converge from both sides, Kash brakes hard, the bike skids, lights close in. Animation style varies by phase — low-multiplier bust is a casual

> arrest (Kash shrugs), Phase 4 bust is cinematic with helicopter landing, Ghost Mode bust triggers a full ending cinematic. The exact crash multiplier is seeded on-chain and shown as a verifiable hash on the result screen.

05 · UI & Screen Specifications

All screens designed for portrait mobile — 390×844px base. Dashboard-style UI overlay on cinematic background.

Screen 1 — Main Game Screen

UI Element	Specification
Background	Cinematic side-scrolling city — rain-soaked wet asphalt, neon signs, wet road reflections of siren lights. Kash on motorbike, police cars behind, helicopter above.
Speedometer Arc	Analogue arc gauge, centre screen. Range: 1× to 50×. Active fill colour gradient: green → orange → red. Dark inactive arc behind. Needle pointing to current multiplier.
Live Multiplier	58px bold, centre of speedometer. Updates every 100ms. White digits, orange × symbol.
Profit Indicator	13px green text below multiplier. Shows current payout at live multiplier (e.g. ▲ +$342.00).
Chase Intensity Bar	Thin 4px progress bar below speedometer. 5 phase labels. Current phase highlighted in orange.
Stat Cards (3)	Best Run (purple) · Profit (green) · Nitro % (orange). Dark semi-transparent cards.
Nitro Bar	Thin horizontal bar showing nitro charge. Orange fill. USE button to activate.
Cash Out Button	Full-width, 58px height, orange gradient, rounded 18px. Shows live cash-out value. Primary action.
Auto Cash-Out	Small toggle below button. Greyed out when off, orange when active with target multiplier shown.
Phase Flash	Phase transitions trigger a full-screen colour flash (red/blue for police, purple for Ghost Mode).

Screen 2 — Roadblock Dodge Event

UI Element	Specification
Trigger	Overlays the main screen. Background dims and red-tints.

UI Element	Specification
Warning Banner	Dark red card, red border, pulsing animation. Text: ROADBLOCK AHEAD / Dodge left or right to survive.
Timer Bar	Full-width progress bar, 2-second countdown. Green → red gradient shrinking left to right.
Dodge Buttons	Two equal buttons: ← DODGE LEFT / DODGE RIGHT →. Blue border, dark background, pulsing glow.
Cash Out Option	Smaller button below dodge buttons. Shows current cash-out value as escape option.
Bonus Preview	Green text below: Correct dodge: +1.5× multiplier bonus.
Timeout Behaviour	If no input within 2 seconds: immediate crash triggered with 'Too slow!' Kash line.

Screen 3 — Helicopter Spotlight

UI Element	Specification
Trigger	Active from 10× onwards. Blue tint wash on scene.
Spotlight Beam	Animated cone from top centre of screen, sweeping left-right. Semi-transparent white/blue gradient polygon.
Warning Card	Blue border card: SPOTLIGHT INCOMING / Cash out before the beam locks on. Pulsing animation.
Multiplier Display	Reduced to 42px to give spotlight visual priority. Blue × accent colour in this phase.
Chase Intensity	Updates to Phase 3 — purple accent on phase label.
Cash Out Button	Blue border variant during chopper phase. Same position and size.
Auto Cash-Out Note	If player has set auto cash-out target, system executes before spotlight locks.

Screen 4 — Ghost Mode (500×+)

UI Element	Specification
Entry Animation	Full-screen purple flash, Kash roars, bike aura activates. 1.5 second cinematic cut.
Background	City blurs. Purple neon streaks replace rain. No police visible. Speed lines radiate.
Ghost Mode Badge	Small pill badge at top: GHOST MODE — purple border, dark purple background.

UI Element	Specification
Multiplier	72px, purple gradient colour. Pulsing glow animation. Shows values in hundreds/thousands.
Kash Quote	Purple-bordered quote card with Kash's Ghost Mode line. Appears 2 seconds after entry.
Cash Out Button	Purple gradient. Shows full cash-out value. High urgency — max value territory.
Footer Note	Italic caption: You are in Ghost Mode. They cannot catch you.

Screen 5 — Bust / Crash Screen

UI Element	Specification
Entry Animation	Squad cars converge animation (phase-dependent). Kash skid, bike falls. 2-second sequence.
Background	LOCKED IN Kash image — red-tinted, darkened. Represents the bust scene.
Header	ROUND OVER (small red) / BUSTED (large red, 52px). Crash multiplier shown below.
Kash Quote	Red-bordered quote card. Line varies by crash phase (see Kash character bible).
Result Card	Dark card: Bet placed / Crash point (red) / Lost (red) / On-chain hash for verification.
Run It Back Button	Red border, full left half. Primary CTA to replay immediately.
History Button	Grey border, right half. Opens session history.

Screen 6 — Bribe the Dispatcher

UI Element	Specification
Access Point	Available before each round from the lobby / pre-round screen. Labelled BUY BONUS.
Background	CHILLIN' Kash image — gold-tinted. Kash on the phone, relaxed, cash visible.
Header	BUY BONUS / Bribe the Dispatcher (white). Player balance shown top right.
Dialogue Box	Gold-tinted card with green live indicator: Dispatcher — Encrypted Line. Kash quote below.
Tier 1 — Small	Dark gold border. $5.00. Delays first crash 10%. Label: +1 guaranteed run window.

UI Element	Specification
Tier 2 — Medium	Gold border (selected state). $25.00. SELECTED badge. Best value label.
Tier 3 — Kingpin	Purple border. $100.00. PREMIUM badge. Full dispatcher blackout + nitro start.
PAY BRIBE Button	Gold border, dark background. Shows selected tier cost. Primary CTA.
Skip Option	Smaller grey button: No thanks — start without bribe.

06 · Visual Design Specification

Colour Palette

Swatch	Hex	Name	Usage
	#0F0F1E	Deep Navy	Primary background, dark UI surfaces
	#EA580C	Chase Orange	Primary CTA, multiplier, speedometer needle, nitro
	#EF4444	Siren Red	Roadblock events, crash/bust screen, siren light wash
	#2563EB	Police Blue	Helicopter phase, dodge buttons, siren light wash
	#7B2FBE	Ghost Purple	Ghost Mode (500×+), Kash quote boxes, phase 5
	#16A34A	Go Green	Profit indicators, nitro ready, provably fair badge
	#EAB308	Bribe Gold	Bribe screen, corrupt cop mechanic, Kingpin tier
	#FFFFFF	White	Primary text, multiplier digits
	#505064	Muted Grey	Secondary text, labels, inactive UI elements

Typography

Element	Specification
Primary Font	System sans-serif (matches Pixi.js BitmapText rendering) — clean, readable at all sizes
Multiplier (main)	58–72px · Weight 500 · White · Letter-spacing -1px
Ghost Mode Multiplier	72px · Weight 500 · Purple #7B2FBE · Glow animation

Element	Specification
Section Labels	10–11px · Weight 500 · Uppercase · Letter-spacing 0.08–0.12em · Muted grey
Body / Descriptions	13px · Weight 400 · Muted grey · Line-height 1.6
Button Text	15–17px · Weight 500 · White or accent colour
Kash Quote Lines	13px · Weight 400 · Italic · Accent colour per phase
Phase Labels	10px · Weight 500 · Uppercase · Active phase in accent colour

Environment Art Direction

Phase	Environment Description
Phase 1 (1×–3×)	Dry city street at night. Warm orange street lamp glow. Distant city skyline. No rain yet. Casual pace. Kash visible on bike, relaxed posture.
Phase 2 (3×–10×)	Rain begins. Wet asphalt reflects red/blue siren lights from one police car now visible behind. Engine sound increases. Puddle splash effects.
Phase 3 (10×–50×)	Heavy rain. Two police cars. Helicopter searchlight beam sweeping from above. Blue tint dominates scene. Rain streaks on screen edges.
Phase 4 (50×–500×)	Storm. Three police cars. Helicopter locked. Red/blue light wash at full intensity. Road surface highly reflective. Kash hunched aggressively forward.
Phase 5 — Ghost	Rain stops suddenly. Purple neon aura around Kash and bike. Speed lines. City blurs. Cops gone. Surreal, electric atmosphere. Ultra-rare visual state.
Bribe Screen	Underground parking garage / dark back alley. Gold/warm tones. Kash at a payphone or holding burner phone. Stacks of cash visible. Relaxed, sly vibe.
Bust Screen	Full stop. Red/blue lights surrounding Kash. Helicopter spotlight directly overhead. Kash standing with hands up. Bike on side. Rain still falling.

07 · Audio Specification

Element	Specification
Base Track (Phase 1)	Lo-fi hip-hop / trap instrumental. ~85 BPM. Relaxed, urban groove. Subtle engine hum underneath.

Element	Specification
Phase 2 Transition	Bass drops. Tempo increases to ~100 BPM. Police siren layer added at low volume. Engine roar louder.
Phase 3 Transition	Full trap beat kicks in. Helicopter rotor blade sound panned overhead. Siren layer intensifies.
Phase 4 Transition	Maximum intensity. Distorted 808 bass. Multiple siren layers. Rain and wind sound effects.
Ghost Mode Entry	Beat drops entirely for 1.5 seconds. Then: euphoric EDM drop. Purple synth arpeggios. Engine pitch-shifted up.
Roadblock Event	Tyre screech SFX. Warning klaxon. Beat pauses during 2-second decision window. Resumes on dodge/crash.
Nitro Collect	Whoosh SFX + engine pitch spike. Short energetic sting. Does not interrupt music flow.
Cash Out	Cash register SFX + short celebratory sting. Kash voiced reaction fires immediately after.
Crash / Bust	Tyre screech + impact SFX. Music cuts abruptly. Police radio chatter. Kash voiced line plays.
Bribe Screen	Smooth jazz / lo-fi beat. Phone ring SFX when screen opens. Subtle 'deal done' chord when bribe confirmed.
Kash Voice	Deep, slow, confident delivery. No rush. Dad jokes delivered completely deadpan. Full VO required for all lines in character bible.

08 · Kash Avatar Integration

Kash appears throughout every moment of the game. He is not a sideline feature — he is a co-pilot. His 3 mood states map directly to game phases.

Mood State	Phase Trigger	Behaviour
CHILLIN'	Phase 1 (1×–3×) · Between rounds · Bribe screen	Relaxed, one hand on bars. Glances at mirror. Delivers dad jokes and crypto puns during idle moments.
LOCKED IN	Phases 2–4 (3×–500×) · Roadblock events · Helicopter	Hunched forward aggressively. Both hands gripping. Glowing green eyes wide. Delivers trash talk and hype lines.
BALLIN'	Ghost Mode (500×+) · Big cash-outs · Nitro collect	Leans back briefly, one hand off bars. Maximum energy. Celebrates wildly. Delivers Ghost Mode lines.

KASH — In-Game Lines

Phase 1 idle: "They sent TWO cars. Two. Do they know who I am? Rhetorical question. Let's ride."

Roadblock: "ROADBLOCK. LEFT OR RIGHT. I would suggest left but I'm not driving. You are. Technically."

Helicopter: "The chopper's up. Don't look at the light. Whatever you do. Don't. Look. At. The. Light."

Nitro: "NITROOOOO — okay we're going faster now. That's on you. I support it."

Bribe confirm: "Dispatcher's been handled. You didn't hear that from me. You heard it from me."

Ghost Mode: "Five hundred times. FIVE HUNDRED. The whole city is looking for us and I have never felt more alive."

Bust: "They got us. It happens to the best. I am the best. So this is fine."

Big cash-out: "Into the alley. Gone. They never saw us. Nobody saw us. Screenshot this."

Dad joke (idle Phase 1): "Why did the criminal fail his driving test? He couldn't stop breaking the law." [complete silence]

09 · Technical Requirements

Requirement	Specification
Frontend Engine	Pixi.js v7+ · WebGL renderer · HTML5 canvas fallback
Target Frame Rate	60 FPS on modern mobile · 30 FPS minimum on mid-range devices
Portrait Resolution	390×844px base (iPhone 14) · Scales to 375×812 and 428×926
Landscape Support	Optional secondary layout — not priority for v1.0
RNG / Provably Fair	SHA-256 hash chain. Server seed + client seed + nonce. Crash point generated pre-round and revealed post-round. On-chain verification link on result screen.
Multiplier Update Rate	Every 100ms (10 updates/second). Smooth interpolation between ticks.
Round State Machine	States: IDLE → BET_PLACED → ROUND_ACTIVE → CASHED_OUT / CRASHED → RESULT → IDLE
Bribe / Buy Bonus	Processed pre-round during IDLE state. Cannot be purchased once ROUND_ACTIVE begins.
Auto Cash-Out	Client-side trigger with server validation. Executed at ≤50ms latency from target multiplier.
Session Persistence	Round history, best run, session P&L stored client-side per session. No account required for guest play.

Requirement	Specification
Crypto / Fiat	Supports both. Fiat: USD, EUR, GBP, BRL (LatAm priority). Crypto: BTC, ETH, USDT, SOL.
Responsible Gaming	Session time display · Deposit limits · Reality check popups · Self-exclusion link in settings
Regulatory	Curaçao B2B (LOK) — annual fee ~€24,000 · 4–8 week approval · RNG certified via BMM or GLI

10 · Success KPIs — 6 Month Targets

KPI	Target
Monthly GGR	$100,000 – $200,000
Distributing Operators	10–20 via Hub88 aggregator
D7 Player Retention	≥ 28%
Average Session Length	18–25 minutes
Time to First Revenue	≤ 90 days post-launch
Bribe Conversion Rate	≥ 15% of rounds include a bribe purchase
Ghost Mode Trigger Rate	< 0.5% of rounds (maintains rarity / excitement)
Streamer Clip Events	Ghost Mode + Roadblock dodge designed as primary clip moments for Twitch/YouTube
